Milk Bar Teat Tool

The Milk Bar Teat Tool makes changing teats so easy. Ideal for removing old teats and inserting new teats.

- Cleverly designed to easily pull out teats.
- Fully galvanized.

Remove teats the easy way!

Place teat in the Milk Bar Teat Tool.

Tighten the Milk Bar Teat Tool over the teat.

Lever the Milk Bar Teat Tool back.

The teat pops out!

Inserting new Milk Bar Teats is just as easy

- Place the tip of the teat on a downward angle through the hole.
- Grab tip with a pair of blunt nose pliers and pull through as far as is easy.
- Use Milk Bar Teat Tool to pull teat into place.

Did you know?

Using pull through teats ensure that the teat stays in the correct angle in the feeder and won't loosen. Screw in teats can rotate and unscrew during feeding.
