Rapid-Exit Stall measurements:

- 16 stall unit with feeding system - 21' 5" x 5' 2" x 5' 3".
- 24 stall unit with feeding system - 31' 11" x 5' 2" x 5' 3".
- 32 stall unit with feeding system - 42' 5" x 5' 2" x 5' 3".

Size	Animals per hour	Milkers
1x24 w/ feeding	150-170	1-2
1x32 w/ feeding	180-200	1-2
2x24 w/ feeding	300-350	2-3
2x32 w/ feeding	450-500	3

*Animals per hour is based on sheep in Greece, not high genetic production animals; for goats you should calculate at least 10% more.

Milking Clusters and Assemblies

Standard Vanguard Assemblies

2039001GS Vanguard Assembly with Silicone Liners for one goat.

2039001SS Vanguard Milking Assembly with Silicone Liners for one sheep.

Heavy Duty Vanguard Assemblies

2039001GH HD Vanguard Assembly with Silicone Liners for one goat.

2039001SH HD Vanguard Assembly with Silicone Liners for sheep.

The ITP205 Assembly for sheep includes two claws, 0/300 liners and shells as well as splitters, bracket and other tubing for a ready-made sheep milking assembly.
**2059001GS** Classic Claw Assembly with Silicone Liners for Goats.

Pulsators

Electronic Pulsators

LE30 Pulsators may be set for cascading pulsation and for a wide variety of speeds, ratios and milking conditions with the Pulsator Controller. Controller has a microprocessor, quartz timing and is designed to minimize heat and stabilize output current. Controller is made of anodized aluminum with ABS plastic cover and resin-sealed internal parts.

Touch-Screen Pulsation Controller for 24 LE pulsators has an appealing compact design and at 6 lbs. is much lighter weight than other controllers. Default settings for rate, ratio, phase and timing are pre-loaded but may be changed via touch screen. Box is totally protected against humidity.

1069001 LE30 Electronic Pulsator, 2-exit style.
1069003 LE30 Electronic Pulsator, 4-exit style.
1049127 Touch-Screen Controller for 24 LE Pulsators. Wt. 6 lbs.

InterPuls Touch-Screen Controller

Helpful tip - always plan for expansion as goats and sheep often birth twins and triplets. Depending on number of operators, number of milking units, animal genetics and other variables throughput for our Rapid Exit Stalls averages seven animals per hour per stall.
