Dynamint is a true water in oil emulsion which delivers the potent properties of essential oils through the skin and into the soft tissue. Dynamint contains powerful peppermint, tea tree, eucalyptus and calendula oils, known for their antibacterial and conditioning properties. Dynamint's unique formulation results in the quickest delivery of the blended essential and precious oils deep into soft tissue where they are needed.

The non-greasy water-based cream is smooth, light and applies quickly and easily. Dynamint cream was formulated to penetrate by osmosis and not simply to remain on top of the skin like competitive products.

Use Dynamint daily where you would other udder creams, confident in the knowledge that there is no better cream available.

Dynamint® Udder Cream

- Helps control and prevent edema, mastitis and infection
- Contains peppermint and other essential oils
- Non-greasy formula is quickly absorbed
- Outstanding healing and stimulation
- Organic approved*

* Standards may vary. Check for local approval.

Dynamint Udder Cream

Dynamint can be used as part of a massage program to help prevent udder edema, mastitis and infection. Many dairymen report massaging with Dynamint to be as good as an oxytocin injection for milk let-down. Others report fewer and milder cases of mastitis after massaging, thus reducing the need for antibiotics. Dynamint is approved for organic use. Dynamint Blue contains a temporary blue coloring agent which makes it easy to see where it has been applied and which cows may need reapplication.

DM2000 Dynamint Jug, 67 oz./ 2 Ltr. (Pump sold separately)

DB2000 Dynamint Blue Jug, 67 oz./ 2 Ltr.

DM0500 Dynamint 16.9 oz./ 500ml

DB0500 Dynamint Blue 16.9 oz./ 500ml

DM0030 Dynamint Pocket-size, 1 oz./ 30ml

Dynamint Jumbo-Pack Dispenser Bag

Dynamint Jumbo-Pack is the economical, labor-saving pack for easy dispensing on large dairies and where Dynamint is used daily. A full 4-liter pack (135 oz.) is used with a reusable squeeze pump (purchased separately) which may be operated with one-hand. Heavyweight plastic bag is folded over at the top and fitted with a grommet for hanging.

DM4000 Dynamint Jumbo-Pack, 4 Ltr./135 oz. (Dispenser Nipple sold separately)

DB4000 Dynamint Blue Jumbo-Pack, 4 Ltr./135 oz. (Dispenser Nipple sold separately)

DD0999 Reusable Dispenser Nipple for hanging pack

Dynamint Blue Spray

Dynamint Blue Udder Spray has the same properties as Dynamint Udder Cream but in sprayable form. Dynamint Spray saves labor especially on large dairies where it can be applied to many cows quickly and the blue coloring agent makes it easy to see which cows have been sprayed. A fine, light, non-greasy mist covers the skin thoroughly and osmosis carries the oils deep into tissue where they can go to work.

DS0500 Dynamint Blue Udder Spray, 16.9 oz./ 500ml

DS4000 Dynamint Blue Udder Spray refill, 4 liter

DS0999 Replacement Spray Head only

Use Dynamint® Udder Cream daily and watch herd health improve.

Coburn® Microfiber Dairy Towels

Coburn Microfiber Dairy Towels are soft, durable, reusable and absorb seven times their weight in water. Our dairy towels are made of a microfiber which is finer than a strand of silk, allowing the cloth to reach into creases and crevices of the udder for more thorough cleaning. The fabric does not kill bacteria but has the property of trapping up to 99% of the bacteria and holding it until washed out. It is recommended to wash and dry at 140°F. Compared with cotton, microfiber is softer, more durable, more absorbent and dries faster. Hemmed towels are 12" x 12".

MDT-06-10 Blue Microfiber Towels, pack of 10 with label. Wt. approx. 1 lb.

MDT-06 Blue Microfiber Towels, bag of 50 with label. Wt. 3.75 lbs.

Coburn® Milking Sleeves

GATHERED CUFF ENDS

950050

Rugged, yet flexible, milking sleeves protect arms and clothing against moisture and abrasion during milking tasks. Yellow Milking Sleeves come in two styles- with comfortable 1-1/2" wide stretch elastic cuff ends or with elastic gathered ends. 18" long. Sold by the pair.

950050 Yellow Neoprene Sleeve, Gathered Cuff Ends, pair. Wt. 3 oz.

Cinnatube® Teat Sealant

Organic Approved

Cinnatube Teat Sealant is a natural, intramammary infusion for the dry period. Cinnatube is a viscous teat sealant that mimics the cow's natural defense, the keratin plug. This defense mechanism is essential as every mastitis case develops from bacteria that has entered the udder via the teat canal. Cinnatube provides a safe and effective physical barrier between the udder and the environment. Administer one syringe into each teat at dry off. Cinnatube is comprised entirely of GRAS listed components and is OMRI listed - it can be used safely in all production, including organic. At the end of the dry period, Cinnatube is easy to strip from the teat, it does not block milk filters and there is no milk withhold. Cinnatube has been demonstrated effective in multiple published, peer-reviewed studies.

CT009 Cinnatube Teat Sealant – 9 mL – Pk/36.

Coburn® Nylon Dairy Apron

Lightweight dairy apron is made of nylon which looks and feels like fabric yet is durable and tear-resistant. The inside is coated for water-resistance. Two pockets and two hang loops are sewn on with reinforcing tape for durability. Apron is hemmed all around and has securely sewn-in cotton tie cords. Overall dimensions not including ties are 45" height by 33" width. Wt. 6 oz.
